

“Digital Skills Development for 21st Century Special Education Needs Teachers”

2022-1-ES01-KA220-SCH-000085645

The importance of the development and upgrade of digital skills of teachers as the core value of providing quality education is becoming more and more important.

The challenges that arose during the Covid19 era also made it clear that the access of pupils with special needs is of vital importance for achieving inclusive educational environments.

The Project aims to increase digital integration in special education

The Project will offer a set of tools for SEN teachers and specialists to evaluate their digital skills and upgrade them accordingly, as well as to align their teaching practices with the digital requirements of the 21st Century, post-Covid era for their pupils.

These tools will be:

- Digital Resources and Learning Outcomes for SEN Teachers
- SEN Online Learning Platform
- Mobile Application for Educational and Technical Software.

About us

The “**DIGI-SKILLS-SEN**” Project is being implemented by a consortium of organizations with extensive expertise in special education, development of educational methodologies and tools, along with integration of ICT and digital tools into formal and non-formal education activities. The partners are: Sorapán de Rieros Foundation- **Spain**, Eurasia Association - **Turkey**, Maria Grzegorzewska University - **Poland**, VAEV R&D - **Austria**, Instituto Secular Hogar de Nazaret - **Spain** and School Center for Inclusive Education Delfinul - **Romania**.
