SETTING OUR NEXT GOALS!

Implementation of Focus Group Meetings with stakeholders in each partner country and collection feedback regarding the training units and modules.

The main purpose of the stakeholder focus group meetings was to **gather valuable feedback and information on the developed training units and modules**. This process aimed to assess the effectiveness and relevance of the training modules in addressing the needs and challenges of youth workers and young people involved in eVolunteering, digital activism and environmental sustainability. The participants showed interest in the training modules and gave positive feedback, which helps us to take the next step of refining the training modules.

Finalization and Translation of the Training Units into partner's national languages

The training units will undergo translation into various languages to cater to the specific countries: Spanish for Spain, Greek for Cyprus and Greece, German for Austria, Italian for Italy, and Finnish for Finland. This translation process is intended to ensure that the training materials are accessible and effective in reaching the target audience in their respective native languages.
